                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Length 30;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 23, Application US/09993059

Patent No. 6887696

GENERAL INFORMATION:
PAPLICANT: GARGER, Stephen A.
APPLICANT: THEREN, Stephen B.
TITLE OF INVENTION: PRODUCTION OF LYSOSOWAL ENZYMES
TITLE OF INVENTION: PLANTES BY TRANSIENT EXPRESSION
TITLE OF INVENTION: PLANTES BY TRANSIENT EXPRESSION
FILE REFERENCE: 008010087CPUS06
CURRENT APPLICATION NUMBER: US/09/993,059
CURRENT FILING DATE: 2001-11-13
NUMBER OF SEQ ID NOS: 37
SOFTWARE: FastSEQ for Windows Version 4.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  "Wilms' tumor growth is suppressed by antianglogenic pigment
epithelium-derived factor in a xenograft model.";
J. Pediatr. Surg. 38:33-342(2003).

J. Pediatr. Surg. 38:33-342(2003).

-!- FUNCTION: Neurotrophic protein; induces extensive neuronal differentiation in retinoblastoma cells. Potent inhibitor of anglogenesis. As it does not undergo the S (stressed) to R (relaxed) conformational transition characteristic of active serpins, it exhibits no serine protease inhibitory activity.

-!- SUBCELLULAR LOCATION: Secreted.
-!- TISSUE SPECIFICITY: Highly expressed in the liver, gastric of brain, heart, lung retina and testes.

-!- DEVELOPMENTAL STAGE: First detected at 12.5 dpc in cartilage primordium, it is present in the osseous matrix of developing limbs, vertebrae, ribs and skull. At 16.5 dpc it is detected in bone matrix and smooth muscle, and at lower levels in connective
"Isolation, purification and characterization of a collagen-associated serpin, caspin, produced by murine colon adenocarcinoma cells."; J. Biol. Chem. 273:15125-15130(1998).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  PubMed=12632345; DOI=10.1053/jpsu.2003.50104; Abramson L.P., Stellmach V., Doll J.A., Cornwell M., Arensman R.M., Crawford S.E.;

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

bone morphogenetic protein homolog GDF6 precursor - mouse (fragment)
NyAlternate names: growth and differentiation factor 6
C;Species: Mus musculus (house mouse)
C;Date: 20-Oct-1994 sequence_revision 07-Feb-1997 #text_change 09-Jul-2004
C;Accession: S43295
R;Stoom. B.B.; Huynh, T.V.; Copeland, N.G.; Jenkins, N.A.; Kingsley, D.M.; Lee, S.J.
Nature 368, 639-643, 1994
A;Title: Limb alterations in brachypodism mice due to mutations in a new member of the TA;Recession: S43294; MUID:94195427; PMID:8145850
A;Accession: S43294; MUID:94195427; PMID:8145850
A;Accession: S43295
A;Molecule type: DNA

New glucocerebrosidase and alpha-galactosidase having a post-translational modification, useful in enzyme replacement therapy for treating lysosomal storage diseases, e.g. Gaucher disease, Niemann-Pick disease, Fabry disease.

Example 11; Fig 5; 102pp; English.

The invention relates to production of lysosomal enzymes in plants by transient expression. The invention particularly relates to disconserve the invention particularly relates to allococarborosidase and alpha-galactosidase having a post-translational modification. The enzymes are useful in enzyme replacement therapy for treating lysosomal storage diseases (e.g. Gaucher disease, Niemann-Pick disease, Fabry disease and Tay-Sachs disease), in researches for developing new approaches to medical treatment of lysosomal storage diseases and in industrial processes involving enzymatic substrate hydrolysis. The present sequence is human recombinant alpha-

```
The invention relates to nucleotide encoding galactosidase (GAL). The invention is useful in gene therapy. The polynucleotides and polypeptides are useful in treating human and animal lysosomal storage diseases, e.g. Pabry's disease and Gaucher's diseases. The present sequence is Tobacco mosaic virus galactosidase C-terminal peptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New lysosomal enzymes, useful in treating human and animal lysosomal storage diseases, e.g. Fabry's disease and Gaucher's diseases.
                                                                      Tobacco mosaic virus WT rGAL-12 (galactosidase) C-terminal peptide.
                                                                                                   Galactosidase; GAL; gene therapy; lysosomal storage disease;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           ò
                                                                                         ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             New polynucleotide for producing active recombinant human and animal lysosomal enzymes in a plant expression system that can be used in enzyme
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 The invention relates to human alpha-galactosidase derivatives and the nucleic acids encoding them. The polypeptides are used in a method for producing active recombinant human and animal lysosomal enzymes in a plant expression system. The enzymes can be used in enzyme replacement therapy for the therapeutic treatment of human and animal lysosomal diseases. This sequence represents an alpha-galactosidase derivative peptide used in the method of the invention.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 lysosomal enzymes in plants by a transfent plant expression system. The invention relates to glucocorebrosidase (GCB, GCR) and alpha-galactosidase enzymes having a post-translational modification provided by the plant expression system. The invention is useful in enzyme replacement therapy for treating lysosomal storage diseases such as gaucher's disease, Niemann-Pick disease, Fabry's disease and Tay-Sachs also useful in researches for developing new approaches to medical increatment of lysosomal storage diseases and ray-Sachs also useful in researches for developing new approaches to medical interactment of lysosomal storage diseases and in industrial processes involving enzymatic substrate hydrolysis. The present sequence is the human alpha-galactosidase-A C-terminal peptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                A pharmaceutical composition comprising a lysosomal enzyme, useful for enzyme replacement therapy for the treatment of lysosomal storage diseases, such as Fabry's disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   present invention relates to the production of human and animal
                                                         Human alpha-galactosidase-A C-terminal peptide #7.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   100.0%; Score 89; DB 8; I

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present invention relates to novel galactosidase (Gal) proteins such as rGAL-12, rGAL-12R, r-GAL-25 or rGAL-25R. The methods and compositions of the present invention are useful for producing recombinant lysosomal enzymes for enzyme replacement therapy for treating human and animal lysosomal storage diseases sucher's disease, Niemann-Pick disease, Rabry disease and Tay-Sachs disease. The present sequence is human rGAL-12 C-terminal peptide used in the exemplification of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          New alpha-galactosidase polypeptides, useful in producing recombinant lysosomal enzymes for the treatment of lysosomal storage diseases, such as Gaucher's disease, Niemann-Pick disease, Fabry disease and Tay-Sachs

New glucocerebrosidase and alpha-galactosidase having a post-translational modification, useful in enzyme replacement therapy for treating lysosomal storage diseases, e.g. Gaucher disease, Niemann-Pick disease, Fabry disease.
                                                                                                                                                                                                                                                                The invention relates to production of lysosomal enzymes in plants by transient expression. The invention particularly relates to glucocerebrosidase and alpha-galactosidase having a post-translational modification. The enzymes are useful in enzyme replacement therapy for treating lysosomal storage diseases (e.g. Gaucher disease, Niemann-Pick disease, Fabry disease and Tay-Sachs disease), in researches for developing new approaches to medical treatment of lysosomal storage diseases and in industrial processes involving enzymatic substrate hydrolysis. The present sequence is human recombinant alpha-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                100.0%; Score 89; DB 5; Length 22; 100.0%; Pred.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ઠે
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ö
                                                                                                                                                                                                                                                                                                                                      New isolated polypeptides useful for producing lysosomal enzymes in plants to be utilized in enzyme replacement therapy or for the therapeutic treatment of human or animal lysosomal storage diseases, e.g.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         lysosomal enzymes in plants by a transient plant expression system. The invention relates to glucocerebrosidase (GCB, GCR) and alphagalactosidase (GA1) enzymes having a post-translational modification provided by the plant expression system. The invention is useful in enzyme replacement therapy for treating lysosomal storage diseases such as Gaucher's disease, Niemann-Pick disease, Fabry's disease, Tay-Sachs disease, Hurler's syndrome and Hurler-Scheie syndrome. The invention is also useful in researches for developing new approaches to medical treatment of lysosomal storage diseases and in industrial processes involving enzymatic substrate hydrolysis. The present sequence is the human galactosidase (GAL) C-terminal peptide present in the vector rGAL-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Gaps

The invention relates to nucleotide encoding galactosidase (GAL). The invention is useful in gene therapy. The polynucleotides and polypeptides are useful in treating human and animal lysosomal storage diseases, e.g. Pabry's disease and Gaucher's diseases. The present sequence is Tobacco mosaic virus galactosidase C-terminal peptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         The present invention relates to novel galactosidase (Gal) proteins such as rGAL-12, rGAL-12R, r-GAL-25 or rGAL-25R.         The invention relates to human alpha-galactosidase derivatives and the nucleic acids encoding them. The polypeptides are used in a method for producing active recombinant human and animal lysosomal enzymes in a plant expression system. The enzymes can be used in enzyme replacement therapy for the therapeutic treatment of human and animal lysosomal diseases. This sequence represents an alpha-galactosidase derivative peptide used in the method of the invention.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             lysosomal enzymes in plants by a transient plant expression system. The invention relates to glucocerebrosidase (GCB, GCR) and alpha-galactosidase enzymes having a post-translational modification provided by the plant expression system. The invention is useful in enzyme replacement therapy for treating lysosomal storage diseases such as Gaucher's disease, Niemann-Pick disease, Fabry's disease and Tay-Sachs disease, Hurler's syndrome and Hurler-Scheie syndrome. The invention is also useful in researches for developing new approaches to medical treatment of lysosomal storage diseases and in industrial processes involving enzymatic substrate hydrolysis. The present sequence is the human alpha-galactosidase-A C-terminal peptide.
of the present invention are useful for producing recombinant lysosomal enzymes for enzyme replacement therapy for treating human and animal lysosomal storage diseases such as Gaucher's disease, Niemann-pick disease, Fabry disease and Tay-Sachs disease. The present sequence is human rGAL-8 C-terminal peptide used in the exemplification of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        A pharmaceutical composition comprising a lysosomal enzyme, useful for enzyme replacement therapy for the treatment of lysosomal storage diseases, such as Fabry's disease.
                                                                                                                                                                                                                                                                                              Gaps

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New isolated polypeptides useful for producing lysosomal enzymes in plants to be utilized in enzyme replacement therapy or for the therapeutic treatment of human or animal lysosomal storage diseases, e.g. Gaucher's disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        lysosomal enzymes in plants by a transient plant expression system. The invention relates to glucocerebrosidase (GCB, GCR) and alphagalactosidase (Gal) enzymes having a post-translational modification provided by the plant expression system. The invention is useful in enzyme replacement therapy for treating lysosomal storage diseases such as Gaucher's disease, Niemann-Pick disease, Pabry's disease, Tay-Sachs disease, Hurler's syndrome and Hurler-Scheie syndrome. The invention is also useful in researches for developing new approaches to medical treatment of lysosomal storage diseases and in industrial processes involving enzymatic substrate hydrolysis. The present sequence is the human galactosidase (GAL) C-terminal peptide present in the vector rGAL-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gauchers disease; metabolic; neurological disease; niemann pick disease; genetic disorder; Pabry disease; metabolic disorder; tay sachs disease; antilipemic; cns-gen.; lysosome storage disease; alpha-galactosidase.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Gaps

```
New polynucleotide for producing active recombinant human and animal lysosomal enzymes in a plant expression system that can be used in enzyme replacement therapy.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         The invention relates to human alpha-galactosidase derivatives and the nucleic acids encoding them. The polypeptides are used in a method for producing active recombinant human and animal lysosomal enzymes in a plant expression system. The enzymes can be used in enzyme replacement therapy for the therapeutic treatment of human and animal lysosomal diseases. This sequence represents an alpha-galactosidase derivative peptide used in the method of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Tobacco mosaic virus WT rGAL-12R (galactosidase) C-terminal peptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Galactosidase; GAL; gene therapy; lysosomal storage disease;

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ô
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               glucocerebrooidase and alpha-galactosidase having a post-translational modification. The enzymes are useful in enzyme replacement therapy for treating lysosomal storage diseases (e.g. Gaucher disease, Niemann-Pick disease, Pabry disease and Tay-Sachs disease), in researches for developing new approaches to medical treatment of lysosomal storage hydrolysis. The present sequence is human recombinant alpha-galactosidase-A C-terminal modified peptide
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               New glucocerebrosidase and alpha-galactosidase having a post-translational modification, useful in enzyme replacement therapy for treating lysosomal storage diseases, e.g. Gaucher disease, Niemann-Pick disease, Pabry disease.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The invention relates to production of lysosomal enzymes in plants by transient expression. The invention particularly relates to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                Human recombinant alpha-galactosidase A modified peptide, rGal-12R.
                                                                                                                                                                                                                                                      Glucocerebrosidase, alpha-galactosidase, Tay-Sachs disease, plant, enzyme replacement therapy, Niemann-Pick disease, Gaucher disease, Fabry disease, lysosomal storage disease, human.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       ;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Tobacco mosaic virus, alpha-galactosidase, lysosomal enzyme, enzyme replacement therapy, lysosomal disease, enzyme.

The invention relates to nucleotide encoding galactosidase (GAL). The invention is useful in gene therapy. The polynucleotides and polypeptides are useful in treating human and animal lysosomal storage diseases, e.g. Pabry's disease and Gaucher's diseases. The present sequence is Tobacco mosaic virus galactosidase C-terminal peptide.
                                                                                                                                                                                                                                                                                                         New lysosomal enzymes, useful in treating human and animal lysosomal storage diseases, e.g. Fabry's disease and Gaucher's diseases.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Query Match

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
